

DIHWorld Audio

Drum / Instrument Manual

Current product versions, controls, presets, meters, and placement

DIHWorld Audio builds connected production systems around the Imhotep 369 Engine—a Triadic Harmonic Lattice—and Ma'at 357 / MomentumBend. Phi-derived control and the canonical Phi/2 ceiling preserve movement, balance, and musical intent without brickwall limiting.

This edition documents 3 current products. Release numbers are taken from the installed DIHWorld Audio Audio Units verified on 2026-10-05; they are product versions, not a shared catalog version.

Canon reference: normalized $\Phi/2 = 0.809016994$. MomentumBend shapes motion and containment; the ceiling is a canonical boundary, not permission for hard limiting.

Operating law: begin from reset or a purpose-matched preset, compare at equal loudness, change one system at a time, and judge the result in the full arrangement.

DIH Drum Morpher

RELEASE	FAMILY	PLACEMENT
v1.0.1	Drum / Instrument	Creative Transform

Sixteen-pad DIH drum sampler and host-timeline sequencer with sample loading, pad shaping, restored factory programs, pattern memory, capture, live sidechain/MPC morph, and performance controls. The current 1.0.1 factory bank is organized around distinct modern patterns including 808, trap, R&B, drill, Afro, Latin, house, pop, cinema, and Bay Area grooves. Selectable MPC C1 chromatic mapping covers Bank A Pads 1-16 on MIDI notes 36-51 while the released GM map remains available for existing sessions. WAV, AIFF, CAF, FLAC, MP3, and OGG loading plus live sidechain return are supported; user-owned third-party samples remain local and are not embedded in public installers.

Recommended use: instrument/plugin generator

Customer formats: AU, VST3, Standalone

Factory starting points — source-derived purpose

808 POCKET

808 POCKET — Routes the kit toward an 808-led low-end voice so the drum pattern carries a defined sub foundation.

OFF-GRID TRAP

OFF-GRID TRAP — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

DARK RNB

DARK RNB — Uses a smoother R&B pocket with more space between hits and a rounder voice choice.

SUBWEIGHT

SUBWEIGHT — Prioritizes SUBWEIGHT on the drum kit for a heavy low pocket; keep kick and bass arrangement space in mind.

HALF-TIME GLIDE

HALF-TIME GLIDE — Slows the perceived pocket and lets Decay/Release carry a longer morph between hits.

DRILL POCKET

DRILL POCKET — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

BROKEN HATS

BROKEN HATS — Thins the kick/body relationship and makes the hat grid the audible motion.

SPARSE SPARK

SPARSE SPARK — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

SPACEY TRAP

SPACEY TRAP — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

STRAIGHT BOUNCE

STRAIGHT BOUNCE — Sets a playable groove pocket; use the calibrated pad notes rather than forcing the kit onto a generic MIDI map.

MINIMAL PULSE

MINIMAL PULSE — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

RIMSHOT CUT

RIMSHOT CUT — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

PERC DRIFT

PERC DRIFT — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

SUB SPACE

SUB SPACE — Leaves more air around the kit and favors a synthetic/ambient morph field.

DRILL TENSION

DRILL TENSION — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

AFRO INTERLOCK

AFRO INTERLOCK — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

FOUR FLOOR MODERN

FOUR FLOOR MODERN — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

ALT POP POCKET

ALT POP POCKET — Sets a playable groove pocket; use the calibrated pad notes rather than forcing the kit onto a generic MIDI map.

LATE DROP

LATE DROP — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

RNB LATE NIGHT

RNB LATE NIGHT — Uses a smoother R&B pocket with more space between hits and a rounder voice choice.

DEMBOW TRAP

DEMBOW TRAP — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

CINEMA DRILL

CINEMA DRILL — Uses a trap/drill pocket with tighter hats, syncopated hits, and a focused low voice.

FAST HAT MODE

FAST HAT MODE — Thins the kick/body relationship and makes the hat grid the audible motion.

GLOBAL INTERLOCK

GLOBAL INTERLOCK — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

AFRO POLYRHYTHM

AFRO POLYRHYTHM — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

LATIN MODERN

LATIN MODERN — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

SLIDE POCKET

SLIDE POCKET — Sets a playable groove pocket; use the calibrated pad notes rather than forcing the kit onto a generic MIDI map.

BAY AREA HYPHY

BAY AREA HYPHY — Sets a distinct pad/engine performance starting point; refine Sample, Hybrid, or Synth per pad after choosing the pocket.

Meters and visualizers

L / R output: Left and right output activity. Confirms stereo drum output and imbalance.

GOVERNOR: Output containment activity. More activity means protection is holding energy back.

MORPH: Current metamorphosis activity. Shows how strongly the active pads are transforming.

Pad waveform: Loaded sample amplitude over time. Use to identify attacks, tails, and silence in each pad.

Ballpark

RELEASE	FAMILY	PLACEMENT
v1.0.1	Drum / Instrument	Creative Transform

Drum impact and placement processor whose base progression and hit calls turn performance energy into an audible stadium-response field.

Recommended use: instrument/drum function

Customer formats: AU, VST3, Standalone

Factory starting points — source-derived purpose

BALLPARK CANON (Mu Metal)

BALLPARK CANON (Mu Metal) — Uses the Mu Metal/shielded material for tight containment and low stray color.

SINGLE TIGHT (Nickel Focus)

SINGLE TIGHT (Nickel Focus) — Keeps the material focused and tight with a Nickel-weighted center.

DOUBLE WIDTH (Copper Body)

DOUBLE WIDTH (Copper Body) — Adds conductive warmth and body with a Copper-centered field.

TRIPLE ENERGY (Iron Weight)

TRIPLE ENERGY (Iron Weight) — Adds firmer iron/steel authority and a more assertive center.

HOME RUN LIFT (Gold Presence)

HOME RUN LIFT (Gold Presence) — Raises presence/authority toward a polished, finished material response.

DUGOUT WARM (Brass)

DUGOUT WARM (Brass) — Rounds the source with brass-like warmth while preserving its core.

STADIUM AIR (Silver Air)

STADIUM AIR (Silver Air) — Chooses a named material response for the source; compare it against the dry track before combining materials.

GLUE DEFENSE (Mu Metal Shield)

GLUE DEFENSE (Mu Metal Shield) — Uses the Mu Metal/shielded material for tight containment and low stray color.

BULLPEN LOCK (Steel)

BULLPEN LOCK (Steel) — Adds firmer iron/steel authority and a more assertive center.

NINTH INNING (Platinum Authority)

NINTH INNING (Platinum Authority) — Raises presence/authority toward a polished, finished material response.

FIFTH TOOL (Alloy)

FIFTH TOOL (Alloy) — Chooses a named material response for the source; compare it against the dry track before combining materials.

CROWDPULSE (Copper Ground)

CROWDPULSE (Copper Ground) — Adds conductive warmth and body with a Copper-centered field.

GRANDSTAND (Bronze)

GRANDSTAND (Bronze) — Chooses a named material response for the source; compare it against the dry track before combining materials.

EXTRA BASES (Titanium)

EXTRA BASES (Titanium) — Chooses a named material response for the source; compare it against the dry track before combining materials.

Meters and visualizers

IN: Input level. Confirms drum energy entering the stadium model.

GR: Gain reduction. Shows active impact containment.

OUT: Output level. Use with IN for level matching.

RMS / PEAK: Body level and fast peak. Their separation describes drum crest and punch.

Ceiling score / hit call: Composite impact, control, and ceiling score. Walk through Home Run describes response intensity, not sports prediction.

DrumKrushGlue

RELEASE	FAMILY	PLACEMENT
v3.6.9	Drum / Instrument	Bus Preferred

Bus-preferred drum cohesion stage for binding hits into one controlled impact field, with secondary dynamics-guard/cyan-dot behavior. A named optional Sidechain enables keyed pocket ducking and remains inactive until Sidechain Key is enabled.

Recommended use: drum-family percussion adhesive; use on drum bus or parallel drum-impact return; secondary dynamics guard/cyan dot

Customer formats: AU, VST3, Standalone

Primary controls

Power • Gain Match • Channel Mode • Dual Mono Link

Factory starting points — source-derived purpose

- DRUM KRUSH GLUE [Stereo]**
DRUM KRUSH GLUE — Sets a drum-bus glue/crush balance with the dry hit still authoritative. Stereo variant: keep the linked center intact and audition width in the full mix.
- TIGHT BUS GLUE [Stereo]**
TIGHT BUS GLUE — Sets a drum-bus glue/crush balance with the dry hit still authoritative. Stereo variant: keep the linked center intact and audition width in the full mix.
- BOOM BAP BODY [Stereo]**
BOOM BAP BODY — Sets a drum-bus glue/crush balance with the dry hit still authoritative. Stereo variant: keep the linked center intact and audition width in the full mix.
- TRAP SNAP KRUSH [Stereo]**
TRAP SNAP KRUSH — Favors fast snap and transient edge for trap percussion. Stereo variant: keep the linked center intact and audition width in the full mix.
- DRILL KICK ANCHOR [Mono]**
DRILL KICK ANCHOR — Anchors the drill kick while keeping the rest of the bus from collapsing inward. Mono variant: collapse the field and use it as a center-focused insert.
- 808 KRUSH WEIGHT [Stereo]**
808 KRUSH WEIGHT — Adds controlled low-end crush and weight for an 808/kick-centered drum bus. Stereo variant: keep the linked center intact and audition width in the full mix.
- PARALLEL KRUSH RETURN [Stereo]**
PARALLEL KRUSH RETURN — Sets a parallel return so crush density can sit beside the dry transient. Stereo variant: keep the linked center intact and audition width in the full mix.
- DUAL MONO DRUM LOCK**
DUAL MONO DRUM LOCK — Applies glue in the selected channel layout; check the center before widening the return.

Meters and visualizers

- IMPACT:** Detected drum peak activity. Shows hit strength entering the impact path.
- BODY:** Sustained drum energy. Shows weight carried between hits.
- REPAIR:** Glue/control activity. Shows how strongly cohesion is correcting the bus.
- CEILING:** Protected output pressure. Persistent maximum activity means the chain is overdriven.
