

DIHWorld Audio

Field / Tone / Balance Technical Manual

Current product versions, controls, presets, meters, and placement

DIHWorld Audio builds connected production systems around the Imhotep 369 Engine—a Triadic Harmonic Lattice—and Ma'at 357 / MomentumBend. Phi-derived control and the canonical Phi/2 ceiling preserve movement, balance, and musical intent without brickwall limiting.

This edition documents 2 current products. Release numbers are taken from the installed DIHWorld Audio Audio Units verified on 2026-10-05; they are product versions, not a shared catalog version.

Canon reference: normalized $\Phi/2 = 0.809016994$. MomentumBend shapes motion and containment; the ceiling is a canonical boundary, not permission for hard limiting.

Operating law: begin from reset or a purpose-matched preset, compare at equal loudness, change one system at a time, and judge the result in the full arrangement.

AUSET

RELEASE	FAMILY	PLACEMENT
v1.0.1	Field / Tone / Balance	Bus Preferred

Field-tone balancer with intensity, tilt, power, and optional Flower of Life dispersal.

Recommended use: tone balance and dispersal field

Customer formats: AU, VST3, Standalone

Exposed parameter surface

Parameter ID	Display name	Type
INTENSITY	Intensity	Float
TILT	Tilt	Float
POWER	Power	Bool
gainmatch	Gain Match	Bool
FLOWER_DISPERSAL	Flower of Life Dispersal	Bool
channelmode	Channel Mode	Choice
dualmonolink	Dual Mono Link	Choice

Factory starting points — source-derived purpose

AUSET NIGHT BALANCE [Stereo]

AUSET NIGHT BALANCE — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 38%, Tilt 50%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET LUNAR LIFT [Stereo]

AUSET LUNAR LIFT — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 58%, Tilt 58%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET SOLAR REVEAL [Stereo]

AUSET SOLAR REVEAL — Uses high Intensity/Tilt for an assertive reveal; match output before committing. Factory recipe: Intensity 86%, Tilt 86%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET VELVET BODY [Stereo]

AUSET VELVET BODY — Tilts the field toward soft body and away from a sharp top. Factory recipe: Intensity 50%, Tilt 24%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET SHADOW DEPTH [Stereo]

AUSET SHADOW DEPTH — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 62%, Tilt 24%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET AIR LIFT REVEAL [Stereo]

AUSET AIR LIFT REVEAL — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 100%, Tilt 74%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET MASTER SUPPORT [Stereo]

AUSET MASTER SUPPORT — Provides moderate Intensity/Tilt support for a master or bus rather than a special effect. Factory recipe: Intensity 40%, Tilt 62%, Flower Dispersal off. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET FLOWER BLOOM [Stereo]

AUSET FLOWER BLOOM — The canonical Flower Bloom demonstration engages Flower of Life Dispersal with both Intensity and Tilt fully open. Factory recipe: Intensity 100%, Tilt 100%, Flower Dispersal on. Stereo variant: keep the linked center intact and audition width in the full mix.

AUSET NIGHT BALANCE [Mono]

AUSET NIGHT BALANCE — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 38%, Tilt 50%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET LUNAR LIFT [Mono]

AUSET LUNAR LIFT — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 58%, Tilt 58%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET SOLAR REVEAL [Mono]

AUSET SOLAR REVEAL — Uses high Intensity/Tilt for an assertive reveal; match output before committing. Factory recipe: Intensity 86%, Tilt 86%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET VELVET BODY [Mono]

AUSET VELVET BODY — Tilts the field toward soft body and away from a sharp top. Factory recipe: Intensity 50%, Tilt 24%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET SHADOW DEPTH [Mono]

AUSET SHADOW DEPTH — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 62%, Tilt 24%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET AIR LIFT REVEAL [Mono]

AUSET AIR LIFT REVEAL — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 100%, Tilt 74%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET MASTER SUPPORT [Mono]

AUSET MASTER SUPPORT — Provides moderate Intensity/Tilt support for a master or bus rather than a special effect. Factory recipe: Intensity 40%, Tilt 62%, Flower Dispersal off. Mono variant: collapse the field and use it as a center-focused insert.

AUSET FULL RANGE [Mono]

AUSET FULL RANGE — Sets AUSET's intensity/tilt field for a named tonal direction. Mono variant: collapse the field and use it as a center-focused insert.

AUSET NIGHT BALANCE [Dual Mono]

AUSET NIGHT BALANCE — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 38%, Tilt 50%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET LUNAR LIFT [Dual Mono]

AUSET LUNAR LIFT — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 58%, Tilt 58%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET SOLAR REVEAL [Dual Mono]

AUSET SOLAR REVEAL — Uses high Intensity/Tilt for an assertive reveal; match output before committing. Factory recipe: Intensity 86%, Tilt 86%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET VELVET BODY [Dual Mono]

AUSET VELVET BODY — Tilts the field toward soft body and away from a sharp top. Factory recipe: Intensity 50%, Tilt 24%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET SHADOW DEPTH [Dual Mono]

AUSET SHADOW DEPTH — Uses restrained Intensity and a darker Tilt for a quieter, deeper field. Factory recipe: Intensity 62%, Tilt 24%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET AIR LIFT REVEAL [Dual Mono]

AUSET AIR LIFT REVEAL — Raises Tilt toward an open lift while keeping Intensity controlled. Factory recipe: Intensity 100%, Tilt 74%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET MASTER SUPPORT [Dual Mono]

AUSET MASTER SUPPORT — Provides moderate Intensity/Tilt support for a master or bus rather than a special effect. Factory recipe: Intensity 40%, Tilt 62%, Flower Dispersal off. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSET FULL RANGE [Dual Mono]

AUSET FULL RANGE — Sets AUSET's intensity/tilt field for a named tonal direction. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

AUSAR

RELEASE	FAMILY	PLACEMENT
v1.0.1	Field / Tone / Balance	Bus Preferred

Restoration processor for hum repair, broadband extraction, transient integrity, and controlled output.

Recommended use: field/tone balance

Customer formats: AU, VST3, Standalone

Exposed parameter surface

Parameter ID	Display name	Type
gainmatch	Gain Match	Bool
HUM_REPAIR	Hum Repair	Float
BROADBAND_EXT	Broadband Extraction	Float
TRANSIENT_INT	Transient Integrity	Float
OUTPUT_GAIN	Output	Float

Factory starting points — source-derived purpose

AUSAR SOURCE RESTORE

AUSAR SOURCE RESTORE — Uses balanced restoration for an archival/source pass before more surgical repair. Factory recipe: Hum Repair 40%, Broadband Ext 47%, Transient Int 53%.

AUSAR RELIC WASH

AUSAR RELIC WASH — Uses stronger restoration to bring damaged or distant material back into a usable field. Factory recipe: Hum Repair 58%, Broadband Ext 58%, Transient Int 58%.

AUSAR RESURRECTION FIELD

AUSAR RESURRECTION FIELD — Uses stronger restoration to bring damaged or distant material back into a usable field. Factory recipe: Hum Repair 86%, Broadband Ext 86%, Transient Int 86%.

AUSAR HUM DEEP CLEAN

AUSAR HUM DEEP CLEAN — Prioritizes Hum Repair while keeping Broadband Extraction and Transient Integrity restrained. Factory recipe: Hum Repair 100%, Broadband Ext 26%, Transient Int 34%.

AUSAR BROADBAND REVEAL

AUSAR BROADBAND REVEAL — Prioritizes Broadband Extraction to reveal a buried source without over-cleaning its transients. Factory recipe: Hum Repair 30%, Broadband Ext 100%, Transient Int 62%.

AUSAR TRANSIENT REPAIR

AUSAR TRANSIENT REPAIR — Prioritizes Transient Integrity so repaired material regains edge and articulation. Factory recipe: Hum Repair 24%, Broadband Ext 38%, Transient Int 100%.

AUSAR ARCHIVAL BALANCE

AUSAR ARCHIVAL BALANCE — Uses balanced restoration for an archival/source pass before more surgical repair. Factory recipe: Hum Repair 62%, Broadband Ext 62%, Transient Int 50%.

AUSAR FULL RANGE PROOF

AUSAR FULL RANGE PROOF — Sets the AUSAR restoration balance across hum, broadband, and transient defects. Factory recipe: Hum Repair 100%, Broadband Ext 100%, Transient Int 100%.
