

DIHWorld Audio

Vocal Mic Quick Reference

Silver reference and Gold color decision guide

DIHWorld Audio builds connected production systems around the Imhotep 369 Engine—a Triadic Harmonic Lattice—and Ma'at 357 / MomentumBend. Phi-derived control and the canonical Phi/2 ceiling preserve movement, balance, and musical intent without brickwall limiting.

This edition documents 2 current products. Release numbers are taken from the installed DIHWorld Audio Audio Units verified on 2026-10-05; they are product versions, not a shared catalog version.

Canon reference: normalized $\Phi/2 = 0.809016994$. MomentumBend shapes motion and containment; the ceiling is a canonical boundary, not permission for hard limiting.

Operating law: begin from reset or a purpose-matched preset, compare at equal loudness, change one system at a time, and judge the result in the full arrangement.

Silver reference / Gold color / WPR adaptive ribbon

SILVER is the M50-referenced neutral comparison stage. Use it to establish an honest, level-matched baseline for vocal, acoustic, and monitoring decisions: truth, air, articulation, transient precision, and spatial reveal. It is a reference voicing, not an automatic correction or universal flat-response promise.

GOLD uses the M50-referenced input followed by deliberate color. Use it only when the arrangement benefits from harmonic body, presence, soul, weight, or dimensional lift. **GOLD** is not a substitute reference and **SILVER** is not a downstream color stage.

WPR is the pressure-responsive ribbon stage. It adapts Damping, Excursion, and Ribbon Guard to the incoming pressure envelope before the ribbon/transformer path. **WPR** is model- and price-agnostic; exact microphone correction requires measured calibration data.

Decision order: gain-match the dry source and **SILVER** first; compare **GOLD** at the same level when color is wanted; use **WPR** when pressure-responsive ribbon behavior is the intended source stage. Do not prescribe a serial **GOLD**-to-**SILVER** chain as a default.
