

DIHWorld Audio - Start Here

Current customer start sheet - DIHWorld Audio only - August 13, 2026

What this package is

This welcome package collects the current DIHWorld Audio customer manuals, routing references, meter guides, and feature-language documents. The website documentation section links these files directly as PDFs.

Install and verify

Install the current DIHWorld Audio package for your operating system, reopen the DAW if needed, then confirm the plugins appear under DIHWorld Audio. If a plugin does not appear, rescan Audio Units or the host plugin cache.

Read in this order

Start with the Customer Quick Guide, then the Complete Manual. Use routing, sidechain, meter, and feature-language references only when you need those specific details.
