

DIHWorld Audio

Bass / Low End Manual

Current product versions, controls, presets, meters, and placement

DIHWorld Audio builds connected production systems around the Imhotep 369 Engine—a Triadic Harmonic Lattice—and Ma'at 357 / MomentumBend. Phi-derived control and the canonical Phi/2 ceiling preserve movement, balance, and musical intent without brickwall limiting.

This edition documents 4 current products. Release numbers are taken from the installed DIHWorld Audio Audio Units verified on 2026-10-05; they are product versions, not a shared catalog version.

Canon reference: normalized $\Phi/2 = 0.809016994$. MomentumBend shapes motion and containment; the ceiling is a canonical boundary, not permission for hard limiting.

Operating law: begin from reset or a purpose-matched preset, compare at equal loudness, change one system at a time, and judge the result in the full arrangement.

MARIANA

RELEASE	FAMILY	PLACEMENT
v1.0.1	Bass / Low End	Low End Source

Sub and foundation processor with depth, sub pressure, kick definition, target mode, and parallel mix. A named optional Sidechain drives kick-aware reduction only when Sidechain Key is enabled, leaving the audible main path neutral otherwise.

Recommended use: low-end/sub field

Customer formats: AU, VST3

Primary controls

Power • Depth • Sub Pressure • Foundation • Kick Define • Target Mode • Input • Mix • Gain Match

Factory starting points — source-derived purpose

MARIANA SWEET SPOT

MARIANA SWEET SPOT — Balanced bass starting point: Depth and Sub Pressure support the low field while Foundation and Kick Define remain controlled.

LOW GRAVITY CLEAN

LOW GRAVITY CLEAN — A clean, centered low-end lift for bass that needs weight without a pronounced pressure bloom.

WARM SUBFIELD

WARM SUBFIELD — Adds a rounded sub field and gentle foundation body; use it on sustained basses or pads that feel too clinical.

SUB WEIGHT

SUB WEIGHT — A dedicated sub-mass recipe; use it when the lowest octave needs authority, then check headroom and mono.

DEEP PRESSURE

DEEP PRESSURE — Pushes Depth and Sub Pressure for a deep, physical bass floor; reserve it for material that can carry the extra energy.

ABYSSAL FIELD

ABYSSAL FIELD — Creates a wide, deep low field for cinematic or spacious bass beds; keep Kick Define available to recover the transient center.

TRENCH FLOOR

TRENCH FLOOR — Anchors the lowest foundation and leaves the upper bass relatively open, useful for a heavy kick/bass relationship.

GENTLE FINISH

GENTLE FINISH — A restrained low-end polish for a nearly finished mix; it should be judged by translation, not by increased loudness.

OCEAN FLOOR

OCEAN FLOOR — A smooth sustained sub-floor for long bass notes and pads, with less emphasis on attack than Kick Pressure.

SUB ENHANCED

SUB ENHANCED — Enhances the sub component while retaining a readable mid-bass center; compare against the dry bass at matched level.

KICK PRESSURE

KICK PRESSURE — Prioritizes Kick Define and short pressure response so the kick and bass share a clear low-end center.

ABYSS BLOOM

ABYSS BLOOM — A larger, blooming low field for impact sections; reduce Depth if the return masks the vocal or kick.

TIDAL TRACE

TIDAL TRACE — Use it on bass or a low-end bus to choose between a clean low floor, weighted sub field, kick pressure, trench depth, or a restrained finish; compare at matched level. Use this MARIANA program as a controlled starting recipe for “TIDAL TRACE”; adjust the exposed processor controls in small, level-matched moves and keep the source role named by the preset in view.

SHALLOW CURRENT

SHALLOW CURRENT — Use it on bass or a low-end bus to choose between a clean low floor, weighted sub field, kick pressure, trench depth, or a restrained finish; compare at matched level. Use this MARIANA program as a controlled starting recipe for “SHALLOW CURRENT”; adjust the exposed processor controls in small, level-matched moves and keep the source role named by the preset in view.

MONOLITH

RELEASE	FAMILY	PLACEMENT
v1.0.1	Bass / Low End	Low End Source

Low-end impact and body shaper with excavation, weight, resonance, reverse motion, drive, and balance. A named optional Sidechain supports kick-controlled Stone Duck and remains inactive until Sidechain Key is enabled.

Recommended use: low-end mass

Customer formats: AU, VST3

Primary controls

gate • input • output • channelmode • gainmatch • excavation • impact • weight • resonance • reverse • drive • balance

Factory starting points — source-derived purpose

MONOLITH PHI IMPACT [Stereo]

MONOLITH PHI IMPACT — Balanced impact and weight with a compact shape for adding physical hit without flattening the envelope. Factory recipe: Impact 38%, Weight 62%, Shape 38%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH PHI IMPACT [Mono]

MONOLITH PHI IMPACT — Balanced impact and weight with a compact shape for adding physical hit without flattening the envelope. Factory recipe: Impact 38%, Weight 62%, Shape 38%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH TRANSIENT STONE [Stereo]

MONOLITH TRANSIENT STONE — Higher impact and weight with a tight shape turns the leading edge into a harder, more stable transient. Factory recipe: Impact 62%, Weight 62%, Shape 38%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH TRANSIENT STONE [Mono]

MONOLITH TRANSIENT STONE — Higher impact and weight with a tight shape turns the leading edge into a harder, more stable transient. Factory recipe: Impact 62%, Weight 62%, Shape 38%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH BODY WEIGHT [Stereo]

MONOLITH BODY WEIGHT — Maximum Weight with moderate Impact emphasizes sustained body for bass, kick, or a thin bus. Factory recipe: Impact 38%, Weight 100%, Shape 38%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH BODY WEIGHT [Mono]

MONOLITH BODY WEIGHT — Maximum Weight with moderate Impact emphasizes sustained body for bass, kick, or a thin bus. Factory recipe: Impact 38%, Weight 100%, Shape 38%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH SHAPE IMPACT [Stereo]

MONOLITH SHAPE IMPACT — Shape-forward impact changes the contour more than the mass; use it when the hit needs a different silhouette. Factory recipe: Impact 38%, Weight 62%, Shape 62%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH SHAPE IMPACT [Mono]

MONOLITH SHAPE IMPACT — Shape-forward impact changes the contour more than the mass; use it when the hit needs a different silhouette. Factory recipe: Impact 38%, Weight 62%, Shape 62%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH BUS CARVE [Stereo]

MONOLITH BUS CARVE — A lighter impact recipe for carving a bus pocket while keeping weight centered and musical. Factory recipe: Impact 24%, Weight 62%, Shape 38%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH BUS CARVE [Mono]

MONOLITH BUS CARVE — A lighter impact recipe for carving a bus pocket while keeping weight centered and musical. Factory recipe: Impact 24%, Weight 62%, Shape 38%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH GATEWAY [Stereo]

MONOLITH GATEWAY — Higher impact and shape open a more animated transient gateway; audition it against the dry bus before stacking color. Factory recipe: Impact 62%, Weight 38%, Shape 62%. Stereo variant: keep the linked center intact and audition width in the full mix.

MONOLITH GATEWAY [Mono]

MONOLITH GATEWAY — Higher impact and shape open a more animated transient gateway; audition it against the dry bus before stacking color. Factory recipe: Impact 62%, Weight 38%, Shape 62%. Mono variant: collapse the field and use it as a center-focused insert.

MONOLITH PHI IMPACT [Dual Mono]

MONOLITH PHI IMPACT — Balanced impact and weight with a compact shape for adding physical hit without flattening the envelope. Factory recipe: Impact 38%, Weight 62%, Shape 38%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONOLITH TRANSIENT STONE [Dual Mono]

MONOLITH TRANSIENT STONE — Higher impact and weight with a tight shape turns the leading edge into a harder, more stable transient. Factory recipe: Impact 62%, Weight 62%, Shape 38%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONOLITH BODY WEIGHT [Dual Mono]

MONOLITH BODY WEIGHT — Maximum Weight with moderate Impact emphasizes sustained body for bass, kick, or a thin bus. Factory recipe: Impact 38%, Weight 100%, Shape 38%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONOLITH SHAPE IMPACT [Dual Mono]

MONOLITH SHAPE IMPACT — Shape-forward impact changes the contour more than the mass; use it when the hit needs a different silhouette. Factory recipe: Impact 38%, Weight 62%, Shape 62%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONOLITH BUS CARVE [Dual Mono]

MONOLITH BUS CARVE — A lighter impact recipe for carving a bus pocket while keeping weight centered and musical. Factory recipe: Impact 24%, Weight 62%, Shape 38%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONOLITH GATEWAY [Dual Mono]

MONOLITH GATEWAY — Higher impact and shape open a more animated transient gateway; audition it against the dry bus before stacking color. Factory recipe: Impact 62%, Weight 38%, Shape 62%. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

Meters and visualizers

INPUT / OUTPUT: Live pre/post level. Use for bypass and level matching.

IMPACT: Low-end transient activity. Shows the punch component being produced.

WEIGHT: Sustained low-frequency body. Shows foundation rather than peak attack.

RESONANCE: Active resonant low-end energy. Persistent high readings warn of ringing.

REVERSE: Reverse-motion contribution. Shows how strongly the reverse path is active.

Monolith field: Combined low-end activity map. Reactive summary, not a spectrum analyzer.

DEPTH_BOOST_PRO

RELEASE	FAMILY	PLACEMENT
v1.0.1	Bass / Low End	Low End Source

Multifaceted DIH Field State bass processor built on delay-based mid/side field placement. Spatial Depth drives field width, focus, convergence, energy, and mix while preserving a mono-safe route for mono input. DEPTH_BOOST_PRO provides low-end placement, delayed field depth, controlled width, Input Trim, Gain Match, and post-field Spatial Gain. In the DEBO -> DEPTH_BOOST_PRO hybrid: drive DEBO for character, use DEBO Output for controlled delivery, then use Spatial Gain only to fairly level the chosen field.

Recommended use: multifaceted DIH Field State bass processor; post-field Spatial Gain (0 dB to -12 dB); blue secondary dot

Customer formats: AU, VST3

Primary controls

Input Trim • Gain Match • Spatial Depth • Spatial Gain • Channel Mode • Dual Mono Link

Factory starting points — source-derived purpose

PHI ROOT TOUCH [Stereo]

PHI ROOT TOUCH — Places the kick/root center forward with restrained spatial depth. Stereo variant: keep the linked center intact and audition width in the full mix.

TIGHT KICK ROOT [Stereo]

TIGHT KICK ROOT — Places the kick/root center forward with restrained spatial depth. Stereo variant: keep the linked center intact and audition width in the full mix.

VOCAL SHADOW LIFT [Stereo]

VOCAL SHADOW LIFT — Adds a controlled front-to-back lift to a vocal without making the whole field wide. Stereo variant: keep the linked center intact and audition width in the full mix.

PHI SPACE OPEN [Stereo]

PHI SPACE OPEN — Opens the spatial return for a wider front-to-back scene. Stereo variant: keep the linked center intact and audition width in the full mix.

LOW END GLUE [Stereo]

LOW END GLUE — Sets a measured depth/gain relationship for moving the source in front-to-back space. Stereo variant: keep the linked center intact and audition width in the full mix.

SUB FLOOR WEIGHT [Stereo]

SUB FLOOR WEIGHT — Extends low-end depth and weight while keeping the bass center mono-compatible. Stereo variant: keep the linked center intact and audition width in the full mix.

BASS WIDTH SPREAD [Stereo]

BASS WIDTH SPREAD — Extends low-end depth and weight while keeping the bass center mono-compatible. Stereo variant: keep the linked center intact and audition width in the full mix.

MIX FRONT TO BACK [Stereo]

MIX FRONT TO BACK — Sets a measured depth/gain relationship for moving the source in front-to-back space. Stereo variant: keep the linked center intact and audition width in the full mix.

DRUM ROOM DEPTH [Stereo]

DRUM ROOM DEPTH — Moves the drum/room return deeper while retaining a readable transient center. Stereo variant: keep the linked center intact and audition width in the full mix.

TEMPLE WIDTH [Stereo]

TEMPLE WIDTH — Opens the spatial return for a wider front-to-back scene. Stereo variant: keep the linked center intact and audition width in the full mix.

CINEMA FLOOR [Stereo]

CINEMA FLOOR — Sets a measured depth/gain relationship for moving the source in front-to-back space. Stereo variant: keep the linked center intact and audition width in the full mix.

LOW FIELD EXTENDER [Stereo]

LOW FIELD EXTENDER — Sets a measured depth/gain relationship for moving the source in front-to-back space. Stereo variant: keep the linked center intact and audition width in the full mix.

MONO BASS FOCUS [Stereo]

MONO BASS FOCUS — Extends low-end depth and weight while keeping the bass center mono-compatible. Stereo variant: keep the linked center intact

and audition width in the full mix.

FULL BUS DEPTH [Stereo]

FULL BUS DEPTH — Sets a measured depth/gain relationship for moving the source in front-to-back space. Stereo variant: keep the linked center intact and audition width in the full mix.

PHI ROOT TOUCH [Mono]

PHI ROOT TOUCH — Places the kick/root center forward with restrained spatial depth. Mono variant: collapse the field and use it as a center-focused insert.

TIGHT KICK ROOT [Mono]

TIGHT KICK ROOT — Places the kick/root center forward with restrained spatial depth. Mono variant: collapse the field and use it as a center-focused insert.

VOCAL SHADOW LIFT [Mono]

VOCAL SHADOW LIFT — Adds a controlled front-to-back lift to a vocal without making the whole field wide. Mono variant: collapse the field and use it as a center-focused insert.

PHI SPACE OPEN [Mono]

PHI SPACE OPEN — Opens the spatial return for a wider front-to-back scene. Mono variant: collapse the field and use it as a center-focused insert.

LOW END GLUE [Mono]

LOW END GLUE — Sets a measured depth/gain relationship for moving the source in front-to-back space. Mono variant: collapse the field and use it as a center-focused insert.

SUB FLOOR WEIGHT [Mono]

SUB FLOOR WEIGHT — Extends low-end depth and weight while keeping the bass center mono-compatible. Mono variant: collapse the field and use it as a center-focused insert.

BASS WIDTH SPREAD [Mono]

BASS WIDTH SPREAD — Extends low-end depth and weight while keeping the bass center mono-compatible. Mono variant: collapse the field and use it as a center-focused insert.

MIX FRONT TO BACK [Mono]

MIX FRONT TO BACK — Sets a measured depth/gain relationship for moving the source in front-to-back space. Mono variant: collapse the field and use it as a center-focused insert.

DRUM ROOM DEPTH [Mono]

DRUM ROOM DEPTH — Moves the drum/room return deeper while retaining a readable transient center. Mono variant: collapse the field and use it as a center-focused insert.

TEMPLE WIDTH [Mono]

TEMPLE WIDTH — Opens the spatial return for a wider front-to-back scene. Mono variant: collapse the field and use it as a center-focused insert.

CINEMA FLOOR [Mono]

CINEMA FLOOR — Sets a measured depth/gain relationship for moving the source in front-to-back space. Mono variant: collapse the field and use it as a center-focused insert.

LOW FIELD EXTENDER [Mono]

LOW FIELD EXTENDER — Sets a measured depth/gain relationship for moving the source in front-to-back space. Mono variant: collapse the field and use it as a center-focused insert.

MONO BASS FOCUS [Mono]

MONO BASS FOCUS — Extends low-end depth and weight while keeping the bass center mono-compatible. Mono variant: collapse the field and use it as a center-focused insert.

FULL BUS DEPTH [Mono]

FULL BUS DEPTH — Sets a measured depth/gain relationship for moving the source in front-to-back space. Mono variant: collapse the field and use it as a center-focused insert.

PHI ROOT TOUCH [Dual Mono]

PHI ROOT TOUCH — Places the kick/root center forward with restrained spatial depth. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

TIGHT KICK ROOT [Dual Mono]

TIGHT KICK ROOT — Places the kick/root center forward with restrained spatial depth. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

VOCAL SHADOW LIFT [Dual Mono]

VOCAL SHADOW LIFT — Adds a controlled front-to-back lift to a vocal without making the whole field wide. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

PHI SPACE OPEN [Dual Mono]

PHI SPACE OPEN — Opens the spatial return for a wider front-to-back scene. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

LOW END GLUE [Dual Mono]

LOW END GLUE — Sets a measured depth/gain relationship for moving the source in front-to-back space. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

SUB FLOOR WEIGHT [Dual Mono]

SUB FLOOR WEIGHT — Extends low-end depth and weight while keeping the bass center mono-compatible. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

BASS WIDTH SPREAD [Dual Mono]

BASS WIDTH SPREAD — Extends low-end depth and weight while keeping the bass center mono-compatible. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MIX FRONT TO BACK [Dual Mono]

MIX FRONT TO BACK — Sets a measured depth/gain relationship for moving the source in front-to-back space. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

DRUM ROOM DEPTH [Dual Mono]

DRUM ROOM DEPTH — Moves the drum/room return deeper while retaining a readable transient center. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

TEMPLE WIDTH [Dual Mono]

TEMPLE WIDTH — Opens the spatial return for a wider front-to-back scene. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

CINEMA FLOOR [Dual Mono]

CINEMA FLOOR — Sets a measured depth/gain relationship for moving the source in front-to-back space. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

LOW FIELD EXTENDER [Dual Mono]

LOW FIELD EXTENDER — Sets a measured depth/gain relationship for moving the source in front-to-back space. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

MONO BASS FOCUS [Dual Mono]

MONO BASS FOCUS — Extends low-end depth and weight while keeping the bass center mono-compatible. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

FULL BUS DEPTH [Dual Mono]

FULL BUS DEPTH — Sets a measured depth/gain relationship for moving the source in front-to-back space. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

Meters and visualizers

Touch sphere: Depth field plus live level. Water motion follows field/level activity; sphere position remains the output control.

Spatial field: Depth, field energy, and motion. A reactive placement view, not a calibrated spectrum.

NTRPL

RELEASE	FAMILY	PLACEMENT
v1.0.1	Bass / Low End	Low End Source

Low-end transformation engine for rewrite map, novelty, interval motion, contour, shape, space, and originality guard. A named optional Sidechain supports keyed Rewrite Duck and remains inactive until Sidechain Key is enabled.

Recommended use: reclassified bass family

Customer formats: AU, VST3

Primary controls

Power • Gain Match • Rewrite Map • Novelty • Chord Rewrite • Motion • Interval Distance • Contour • Shape • Space • Originality Guard • Mix

Factory starting points — source-derived purpose

01 SOURCE TRACE [Stereo]

01 SOURCE TRACE — Keeps the original contour and novelty low so the rewrite begins from an honest source trace. Stereo variant: keep the linked center intact and audition width in the full mix.

02 PHI BODY REWRITE [Stereo]

02 PHI BODY REWRITE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Stereo variant: keep the linked center intact and audition width in the full mix.

03 LOW WEIGHT LATTICE [Stereo]

03 LOW WEIGHT LATTICE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Stereo variant: keep the linked center intact and audition width in the full mix.

04 HARMONIC REWRITE [Stereo]

04 HARMONIC REWRITE — Moves Chord Rewrite and Interval Distance into a deliberate harmonic re-voicing. Stereo variant: keep the linked center intact and audition width in the full mix.

05 ALT PHI FIELD [Stereo]

05 ALT PHI FIELD — Applies controlled harmonic novelty and motion to the source while preserving a usable dry relationship. Stereo variant: keep the linked center intact and audition width in the full mix.

06 WIDE RECONTOUR [Stereo]

06 WIDE RECONTOUR — Spreads the rewritten contour into a wider field; audition the dry center in mono. Stereo variant: keep the linked center intact and audition width in the full mix.

07 DEEP BASS BLOOM [Stereo]

07 DEEP BASS BLOOM — Builds a deeper bass/body rewrite with Shape and Space carrying the field. Stereo variant: keep the linked center intact and audition width in the full mix.

08 EDGE TRANSLATION [Stereo]

08 EDGE TRANSLATION — Translates the source edge into a new contour without discarding its timing identity. Stereo variant: keep the linked center intact and audition width in the full mix.

01 SOURCE TRACE [Mono]

01 SOURCE TRACE — Keeps the original contour and novelty low so the rewrite begins from an honest source trace. Mono variant: collapse the field and use it as a center-focused insert.

02 PHI BODY REWRITE [Mono]

02 PHI BODY REWRITE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Mono variant: collapse the field and use it as a center-focused insert.

03 LOW WEIGHT LATTICE [Mono]

03 LOW WEIGHT LATTICE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Mono variant: collapse the field and use it as a center-focused insert.

04 HARMONIC REWRITE [Mono]

04 HARMONIC REWRITE — Moves Chord Rewrite and Interval Distance into a deliberate harmonic re-voicing. Mono variant: collapse the field and use it as a center-focused insert.

05 ALT PHI FIELD [Mono]

05 ALT PHI FIELD — Applies controlled harmonic novelty and motion to the source while preserving a usable dry relationship. Mono variant: collapse the field and use it as a center-focused insert.

06 WIDE RECONTOUR [Mono]

06 WIDE RECONTOUR — Spreads the rewritten contour into a wider field; audition the dry center in mono. Mono variant: collapse the field and use it as a center-focused insert.

07 DEEP BASS BLOOM [Mono]

07 DEEP BASS BLOOM — Builds a deeper bass/body rewrite with Shape and Space carrying the field. Mono variant: collapse the field and use it as a center-focused insert.

08 EDGE TRANSLATION [Mono]

08 EDGE TRANSLATION — Translates the source edge into a new contour without discarding its timing identity. Mono variant: collapse the field and use it as a center-focused insert.

01 SOURCE TRACE [Dual Mono]

01 SOURCE TRACE — Keeps the original contour and novelty low so the rewrite begins from an honest source trace. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

02 PHI BODY REWRITE [Dual Mono]

02 PHI BODY REWRITE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

03 LOW WEIGHT LATTICE [Dual Mono]

03 LOW WEIGHT LATTICE — Rewrites interval/body emphasis toward a denser low-mid lattice while Originality Guard protects recognition. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

04 HARMONIC REWRITE [Dual Mono]

04 HARMONIC REWRITE — Moves Chord Rewrite and Interval Distance into a deliberate harmonic re-voicing. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

05 ALT PHI FIELD [Dual Mono]

05 ALT PHI FIELD — Applies controlled harmonic novelty and motion to the source while preserving a usable dry relationship. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

06 WIDE RECONTOUR [Dual Mono]

06 WIDE RECONTOUR — Spreads the rewritten contour into a wider field; audition the dry center in mono. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

07 DEEP BASS BLOOM [Dual Mono]

07 DEEP BASS BLOOM — Builds a deeper bass/body rewrite with Shape and Space carrying the field. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

08 EDGE TRANSLATION [Dual Mono]

08 EDGE TRANSLATION — Translates the source edge into a new contour without discarding its timing identity. Dual-mono variant: preserve independent left/right decisions for asymmetric sources.

Meters and visualizers

SOURCE: Original input contribution. Shows how much source survives into the main route.

REWRITE: Generated harmonic-rewrite activity. Shows the newly synthesized low-end material.

ALT OUT: Alternative new-signal output. Always represents the generated signal path.

MAIN: Final blended output. Use against SOURCE for level and blend context.

Harmonic Rewriter: Live input-to-output contour. Shows source energy changing into rewritten energy.

Rewrite Map: Novelty, chord, interval, contour, motion, space, guard, and mix state. A live process map; it is not a frequency analyzer.
