

DIHWorld Audio

Creative Transform Manual

Current product versions, controls, presets, meters, and placement

DIHWorld Audio builds connected production systems around the Imhotep 369 Engine—a Triadic Harmonic Lattice—and Ma'at 357 / MomentumBend. Phi-derived control and the canonical Phi/2 ceiling preserve movement, balance, and musical intent without brickwall limiting.

This edition documents 3 current products. Release numbers are taken from the installed DIHWorld Audio Audio Units verified on 2026-09-05; they are product versions, not a shared catalog version.

Canon reference: normalized $\Phi/2 = 0.809016994$. MomentumBend shapes motion and containment; the ceiling is a canonical boundary, not permission for hard limiting.

Operating law: begin from reset or a purpose-matched preset, compare at equal loudness, change one system at a time, and judge the result in the full arrangement.

SlotMachine

RELEASE	FAMILY	PLACEMENT
v2.2.6	Creative Transform	Creative Transform

Three-chamber creative host that combines source, opposition, and resolution through architecture, blend, morph, and containment.

Recommended use: creative transform

Customer formats: AU, VST3, Standalone

Primary controls

Chamber A Source • Chamber B Opposition • Chamber C Resolution • Architecture • Blend • Morph • Containment • Channel Mode • Dual Mono Link • Gain Match

Factory starting points

SLOTMACHINE CANON RESET [Stereo] • RELIC SPIN [Stereo] • IMPACT REROUTE [Stereo] • GOLDEN COLLISION [Stereo] • SOVEREIGN FLIP [Stereo] • WORMHOLE PRIZE [Stereo] • PARALLAX JACKPOT [Stereo] • FOCUSED CHAMBER [Stereo] • SLOTMACHINE CANON RESET [Mono] • RELIC SPIN [Mono] • IMPACT REROUTE [Mono] • GOLDEN COLLISION [Mono] • SOVEREIGN FLIP [Mono] • WORMHOLE PRIZE [Mono] • PARALLAX JACKPOT [Mono] • FOCUSED CHAMBER [Mono] • SLOTMACHINE CANON RESET [Dual Mono] • RELIC SPIN [Dual Mono] • IMPACT REROUTE [Dual Mono] • GOLDEN COLLISION [Dual Mono] • SOVEREIGN FLIP [Dual Mono] • WORMHOLE PRIZE [Dual Mono] • PARALLAX JACKPOT [Dual Mono] • FOCUSED CHAMBER [Dual Mono]

Meters and visualizers

INPUT: Input peak. Confirms level entering the three chambers.

OUTPUT: Output peak. Use for level matching.

RMS: Average program body. Shows sustained density.

CREST: Peak-to-RMS relationship. Higher values mean sharper transients; lower values mean denser material.

ARCHAEOLOGIST X

RELEASE	FAMILY	PLACEMENT
v2.0.6	Creative Transform	Creative Transform

Forensic recovery processor for excavation, recovery field, harmonic extraction, layer selection, gate, and parallel mix.

Recommended use: creative recovery/excavation

Customer formats: AU, VST3, Standalone

Primary controls

Power • Gain Match • Excavation Engine • Recovery Field • Harmonic Extraction • Forensic Layer • Gate • Mix • Output • Profile • Mode • Channel Mode

Factory starting points

ARCHX CANON RESET [Stereo] • RELIC VOICE [Stereo] • DUST DETAIL [Stereo] • BODY RECOVERY [Stereo] • AIR SCRIPT [Stereo] • FORENSIC LENS [Stereo] • TEMPLE MEMORY [Stereo] • FULL EXCAVATION FIELD [Stereo] • ARCHX CANON RESET [Mono] • RELIC VOICE [Mono] • DUST DETAIL [Mono] • BODY RECOVERY [Mono] • AIR SCRIPT [Mono] • FORENSIC LENS [Mono] • TEMPLE MEMORY [Mono] • FULL EXCAVATION FIELD [Mono] • ARCHX CANON RESET [Dual Mono] • RELIC VOICE [Dual Mono] • DUST DETAIL [Dual Mono] • BODY RECOVERY [Dual Mono] • AIR SCRIPT [Dual Mono] • FORENSIC LENS [Dual Mono] • TEMPLE MEMORY [Dual Mono] • FULL EXCAVATION FIELD [Dual Mono]

Meters and visualizers

INPUT / OUTPUT: Live pre/post peak. Use for bypass and level matching.

EXCAVATION: Low/deep recovery activity. Shows energy being uncovered by excavation.

RECOVERY: Recovered-source contribution. Shows how much repaired material is active.

HARMONIC: Extracted harmonic activity. Shows reconstructed tonal information.

FORENSIC: Forensic layer/gate activity. Shows the selective analysis path at work.

Observation Field: Combined four-process activity. A process summary, not a spectrum.

SERQET

RELEASE	FAMILY	PLACEMENT
v1.0.4	Creative Transform	Creative Transform

Creative sting and width processor with intensity, venom saturation, convergence focus, and output control.

Recommended use: width/creative secondary

Customer formats: AU, VST3

Primary controls

Width Reach • Movement Trace • Prism Focus • Output Master • Gain Match • Channel Mode • Dual Mono Link

Factory starting points

SERQET CANON WIDTH [Stereo] • SERQET VEIL MOTION [Stereo] • SERQET PRISM LENS [Stereo] • SERQET WIDE FIELD [Stereo] • SERQET BUS VEIL [Stereo] • SERQET CANON WIDTH [Mono] • SERQET VEIL MOTION [Mono] • SERQET PRISM LENS [Mono] • SERQET WIDE FIELD [Mono] • SERQET BUS VEIL [Mono] • SERQET CANON WIDTH [Dual Mono] • SERQET VEIL MOTION [Dual Mono] • SERQET PRISM LENS [Dual Mono] • SERQET WIDE FIELD [Dual Mono] • SERQET BUS VEIL [Dual Mono]

Meters and visualizers

RMS WIDTH: Input RMS feeding the width field. Shows source energy available for widening.

PRISM WIDTH: Measured side-field width. Higher values indicate a broader stereo prism.

OUTPUT FIELD: Post-process RMS energy. Use with RMS WIDTH for level context.

Prism visualizer: Width, motion, focus, and output state. The polygon is a spatial-state map, not a loudness target.
