

DIHWorld Audio — 42 Plugin Placement Schematic

Date: 2026-07-25 Authority: ../CURRENT_FAMILY_AUTHORITY.md Routing source: ../ROUTING_PLACEMENT_CANON.md Smart Position source: ../SMART_POSITION/SMART_POSITION_CANON.md and ../SMART_POSITION/SMART_POSITION_MANIFEST.json Companion planning page: DIH_13_FAMILY_42_PLUGIN_TEMPLATE_SCHEMATIC_20260722.md

Purpose

ROUTING_PLACEMENT_CANON.md gives every family a placement summary, but only fully works out the per-plugin Primary/Secondary/Group-Bus/Parallel rail for two families (FX_SPATIAL and DIMENSIONAL_IMPACT_MOVE). This schematic extends that exact same per-plugin rail to all 13 families and all 42 plugins, so every plugin page, quick-start card, and routing sheet has one place to pull its placement row from.

Nothing here overrides the authority chain above. If a plugin's row conflicts with CURRENT_FAMILY_AUTHORITY.md or SMART_POSITION_CANON.md, those files win.

Current implementation note: ANUBIS accepts a named stereo sidechain with independent Key/Duck functions; DEBO uses nine updated programs with restored iCloud canonical naming; TRIPLER uses the repaired clean left/right harmony path and corrected return level; SESHAT named views hide unrelated panels; AU and DIH Drum Morpher are current registered instruments, with Drum Morpher factory programs restored.

How to read a row

Smart Position class	The machine-readable placement class from SMART_POSITION_MANIFEST.json (INSERT_SAFE, BUS_PREFERRED, MIX_BUS, MASTER_FIELD, OBSERVATION, CREATIVE_TRANSFORM, LOW_END_SOURCE).
Primary	First recommended placement for normal use.
Secondary	Next useful position when the session calls for it.
Group/Bus	Exact stem, aux, return, or master lane.
Parallel	Yes / Optional / No, with guidance.
Note	One-line user-facing placement note, including any secondary dot tag.

Dots on the plugin face are the compact version of this table (bright = confirmed role, dim = available, slow pulse = better placement suggested, flashing = risk detected). This table is the long-form source those dots are summarizing.

VOCAL_MIC_SOURCE — Gold — 6 plugins

Family default: Track Insert / Vocal Bus / Lead or Background Vocal Bus / usually no parallel unless noted. Lead Vocal Bus decision: establish a SILVER M50 reference baseline, then compare optional GOLD -> AEGIS_NOVA color at equal loudness. Do not prescribe a serial GOLD -> AEGIS_NOVA -> SILVER chain. Background Vocal Bus chain: GOLD -> TRIPLER -> EchoLocate.

GOLD	INSERT_SAFE	Track Insert	Vocal Bus color option	Lead Vocal Bus / Background Vocal Bus	Usually no	Deliberate source/vocal color: compare against the level-matched SILVER reference baseline before retaining harmonic body, presence, soul, weight, or dimensional lift.
AEGIS_NOVA	INSERT_SAFE	Track Insert	Vocal Bus protective stage	Lead Vocal Bus after the chosen source-tone decision	Usually no	Vocal/source protection and tone; use after optional GOLD color, not as a bridge into a downstream SILVER stage.
SILVER	INSERT_SAFE	Track Insert	Reference comparison / monitoring	Source or vocal reference lane	Usually no	Neutral M50 reference microphone for truthful level and tone comparison; it establishes the baseline and is not the end of a serial lead-vocal chain.
TRIPLER	INSERT_SAFE	Track Insert	Vocal Bus (chain middle)	Background Vocal Bus (middle slot)	Yes, for stacks/doubles	Mic-array enhancement for stacks and doubles; secondary Width tag.
EchoLocate	INSERT_SAFE	Track Insert	Vocal Bus (chain end)	Background Vocal Bus (chain-end)	Usually no	Source localization; closes the Background Vocal Bus chain.
WPR	INSERT_SAFE	Track Insert	Vocal Bus	Lead/Background Vocal Bus (substitution slot)	Optional, for width	Ribbon mic source shaping; secondary Width tag.

DYNAMICS_GUARD — Cyan — 4 plugins

Family default: Track Insert or Group Bus by product / Dynamics Bus / Vocal-Dynamics Bus / product-specific parallel. Dynamics Bus chain: ANUBIS -> OTIS -> DEBO.

ANUBIS	INSERT_SAFE	Track Insert	Dynamics Bus (chain start)	Dynamics Bus (first slot)	No	Gate/expander plus RMS guard; opens the Dynamics Bus chain.
OTIS	INSERT_SAFE	Track Insert	Dynamics Bus (chain middle) / Mastering Support	Dynamics Bus (middle slot)	No	Dynamics support with secondary silver Mastering Support dot.
DEBO	INSERT_SAFE	Track Insert	Dynamics Bus (chain end)	Dynamics Bus (chain-end)	Yes, pressure-activated	Only DYNAMICS_GUARD plugin with an explicit parallel-impact return.
LOOKOUT	INSERT_SAFE	Track Insert	Dynamics Bus (chain end) / Observation / Mastering Support	Dynamics Bus (chain-end)	No	Dual-envelope transient/sustain shaper: Attack/Sustain directly move transient and sustain gain up to +/-18dB. Eye of Heru advisory guidance and silver Mastering Support are secondary dots, not the primary function.

BASS_LOW_END — Brown/low-gold — 3 plugins

Family default: Track Insert / Bass Bus / Bass-Low-End Bus / usually no, parallel only for controlled sub reinforcement. Bass Bus chain: MARIANA -> MONOLITH.

MARIANA	LOW_END_SOURCE	Track Insert	Bass Bus (chain start)	Bass Bus (first slot)	No	Sub/low-end field foundation; opens the Bass Bus chain.
MONOLITH	LOW_END_SOURCE	Track Insert	Bass Bus (chain end)	Bass Bus (last slot)	No	Low-end mass/weight; closes the Bass Bus chain.
DEPTH_BOOST_PRO	LOW_END_SOURCE	Track Insert	Bass Bus (definition alternate) / Spatial Gain Support	Bass Bus (replaces MONOLITH slot)	Optional, controlled sub reinforcement	Replaces MONOLITH in the 7-Bus template when extra low-end definition is needed. Secondly a spatial gain plugin: a dedicated Spatial Gain control (0dB to -12dB) sits after its delay-based depth/width field, not a generic output trim; blue secondary dot.

DRUM_INSTRUMENT — Red-orange — 3 plugins

Family default: Instrument Track or Drum Bus by product / Track Insert-Drum Bus / Drum Bus / product-specific parallel. Drum Bus chain: DIH_DRUM_MORPHER -> BALLPARK -> DRUMKRUSHGLUE.

DIH_DRUM_MORPHER	CREATIVE_TRANSFORM	Instrument Track	Drum Bus (chain start)	Drum Bus (first slot)	No, source instrument	Instrument-level drum generator/morpher; opens the Drum Bus chain.
BALLPARK	CREATIVE_TRANSFORM	Track Insert	Drum Bus (chain middle)	Drum Bus (middle slot)	Optional, bus energy	Supports bus energy in the middle Drum Bus slot.
DRUMKRUSHGLUE	BUS_PREFERRED	Drum Bus	Track Insert / Dynamics Guard support	Drum Bus (chain-end) or Parallel Drum-Impact Return	Yes	Primary DRUM_INSTRUMENT with secondary cyan Dynamics Guard Support dot for transient, pressure, and cohesion work.

COLOR_AMP_TAPE — Red-orange — 4 plugins

Family default: Track Insert / Color Bus / Music-Instrument or Parallel Color Bus / yes for color blend, no hidden level lift. Instrument/Color Bus chain: KHEPRI -> PTAHTUBE -> APIS.

KHEPRI	INSERT_SAFE	Track Insert	Color Bus (chain start) / Mastering Support	Music/Instrument Bus or Parallel Color Bus (first slot)	Yes, color blend	Default Mix at 1/Phi per canon; secondary silver Mastering Support dot; opens the Color Bus chain.
PTAHTUBE	INSERT_SAFE	Track Insert	Color Bus (chain middle)	Music/Instrument Bus or Parallel Color Bus (middle slot)	Yes, color blend	Tube color stage; check vocal clarity when inserted on vocal sources.
APIS	INSERT_SAFE	Track Insert	Color Bus (chain end)	Music/Instrument Bus or Parallel Color Bus (last slot)	Yes, color blend	Amp/color source tone; closes the Instrument/Color Bus chain.
SOVEREIGN	MIX_BUS	Mix Bus	Color Bus alternate / Mastering Support	Parallel Color Bus (replaces one KHEPRI/PTAHTUBE/APIS slot)	Yes	Stronger color and bus authority; replaces a Color Bus slot when needed; secondary silver Mastering Support dot.

FIELD_TONE_BALANCE — White — 2 plugins

Family default: Group Bus / Track Insert when subtle / Music-Field Tone Bus / optional, especially for dispersal.

AUSET	BUS_PREFERRED	Group Bus	Track Insert (subtle, vocal-first use)	Music/Field Tone Bus	Optional, dispersal field	Tone balance and dispersal field; also carries a secondary Vocal First tag for subtle direct-insert use.
AUSAR	BUS_PREFERRED	Group Bus	Track Insert when subtle	Music/Field Tone Bus	Optional	Field/tone balance counterpart to AUSET.

DIMENSIONAL_IMPACT_MOVE — Purple — 3 plugins

Family default: Track Insert or Width Bus by product / Aux Return / Width-Depth Bus / yes for PARALLAX and NSR. Width/Depth Bus chain: DEPTH_IMPACT_HYBRID_X -> PARALLAX -> NSR.

DEPTH_IMPACT_HYBRID_X	INSERT_SAFE	Track Insert	Width/Depth Bus	Width/Depth Bus	Optional	Spectral clarity, harmonic depth, and hybrid spatial field; can sit on a source or shape the bus.
PARALLAX	BUS_PREFERRED	Group Bus	Aux Return	Width/Depth Bus	Yes	Bus-preferred dimensional placement. Default Mix belongs at 1/Phi unless product canon changes.
NSR	BUS_PREFERRED	Aux Return	Group Bus	Width/Depth or Parallel Spatial Bus	Yes	Phi-based spatial delay with motion, microphase, and flange. Default Mix at 1/Phi.

Reused verbatim from ROUTING_PLACEMENT_CANON.md — this is the already-authoritative source table for this family.

FX_SPATIAL — Purple — 3 plugins

Family default: Aux Return / Group Bus / Parallel Spatial Bus / yes, this is the main home for shared space. Parallel Spatial Bus chain: NTRSTLLR -> Cathedral -> SacredVerb.

NTRSTLLR	BUS_PREFERRED	Aux Return	Source Insert	Parallel Spatial Bus	Yes	Phi delay/nebula/wormhole space. Use as a shared return first; insert only when the source needs its own moving delay field.
Cathedral	BUS_PREFERRED	Aux Return	Group Bus	Parallel Spatial Bus	Yes	Flagship room/architecture space. Best as a shared space return or group-space bus.
SacredVerb	BUS_PREFERRED	Aux Return	Group Bus	Parallel Spatial Bus	Yes	Sacred/chamber reverb. Best as a shared reverb return; keep Solfeggio lanes as musical triggers, not gain controls.

Reused verbatim from ROUTING_PLACEMENT_CANON.md — this is the already-authoritative source table for this family.

HARMONICS_PITCH — Green — 4 plugins

Family default: Track Insert / Bus analysis-tone / Harmonics-Pitch lane / usually no unless product-specific mode says so.

THOTH	INSERT_SAFE	Track Insert	Bus analysis/tone	Harmonics/Pitch lane (Instrument Bus alternate)	No, unless product mode states otherwise	Harmonic EQ and pitch guidance; alternates into the Instrument Bus when harmonic pitch is the specific problem.
NTRPL	INSERT_SAFE	Track Insert	Vocal, instrument, music, or bass source	Harmonics/Pitch lane	No	Source-preserving harmonic rewrite and melodic interpolation. Signature Series is a collection tag, not a mastering family.
TEHUTI	INSERT_SAFE	Track Insert	Bus analysis/tone	Harmonics/Pitch lane	No	Harmonic EQ and pitch guidance companion to THOTH.
AU	INSERT_SAFE	Track Insert	Bus analysis/tone	Harmonics/Pitch lane	No	Sidechain harmonic shaping utility.

CREATIVE_TRANSFORM — Red-orange — 3 plugins

Family default: Track Insert / Parallel Creative Bus / Creative Transform Bus / yes for creative blend, not for transparent correction.

SLOTMACHINE	CREATIVE_TRANSFORM	Track Insert	Parallel Creative Bus	Creative Transform Bus	Yes, creative blend	Intentional character transform, not a transparency tool.
ARCHAEOLOGIST_X	CREATIVE_TRANSFORM	Track Insert	Parallel Creative Bus	Creative Transform Bus	Yes, creative blend	Creative recovery/excavation processing for special moments.
SERQET	CREATIVE_TRANSFORM	Track Insert	Parallel Creative Bus / Width alternate	Creative Transform Bus, or Width/Depth Bus as a PARALLAX substitute	Yes	Can replace PARALLAX for creative width per the Cascading Bus substitution rule; secondary Width tag.

MASTERING_CORE — Silver — 5 plugins

Family default: Mix Bus / Master Field / Master Bus / no, unless a documented parallel mastering workflow exists. Clean chain: SPHYNX -> MAAT -> ANKH -> SESHAT. Loud chain: SPHYNX -> HORIZON_X -> ANKH -> SESHAT. Authority chain: PLATINUM -> IMHOTEP -> ANKH -> SESHAT.

SPHYNX	MIX_BUS	Mix Bus	Master Field	Master Bus (chain-start, clean and loud chains)	No	Prepares material before field/finalization; opens both the clean and loud master chains.
MAAT	MIX_BUS	Mix Bus	Observation / Master Field	Master Bus (clean-chain middle slot)	No	Balance/justice stage with secondary green Observation dot; middle of the clean master chain.
HORIZON_X	MIX_BUS	Mix Bus	Master Field	Master Bus (loud-chain middle slot, MAAT alternate)	No	Controlled-lift finalizer; replaces MAAT in the loud master chain.
PLATINUM	MIX_BUS	Mix Bus	Color/Amp/Tape Support (red-orange)	Master Bus (authority-chain start)	No	Primary MASTERING_CORE with secondary red-orange Color/Amp/Tape Support for master-bus body; opens the authority chain.
ANKH	MASTER_FIELD	Master Field	Mix Bus	Master Bus (chain-end of every master chain)	No	Final containment authority; sits at the end of every master chain, immediately before SESHAT.

MASTER_FIELD — Silver — 1 plugin

IMHOTEP	MASTER_FIELD	Master Field	Mix Bus	Master Bus (authority-chain middle slot, between PLATINUM and ANKH)	No	Macro master-field structure and finish stage in the authority chain.

UTILITY_OBSERVATION — Green — 1 plugin

SESHAT	OBSERVATION	Observation	Print/Analysis endpoint	Print/Master endpoint (last in every master chain)	No	Translates phi score into guidance; always last on the print/master endpoint; not counted toward the 3-active-processor limit.

Maintenance Rule

When a plugin's family, color, or Smart Position class changes in `CURRENT_FAMILY_AUTHORITY.md` or `SMART_POSITION_MANIFEST.json`, update that plugin's row here in the same pass. This file should never drift ahead of or behind those two authority files.
