ANUBIS

USER MANUAL | VERSION 1.0.1 | 2026-09-01

Purpose

A dynamics gate and guard with threshold, ratio, attack, hold, release, range, named sidechain keying, ducking, protected I/O, and parallel mix.

Fast Start

Select a program by source role. Route the host sidechain only when Key or Duck is required; it is never mixed into the output. Compare IN and OUT while adjusting threshold and range.

Controls

Control	Use
Threshold / Ratio	Set the opening point and response strength.
Attack / Hold / Release	Shape how the gate catches, holds, and returns.
Range	Sets the maximum attenuation floor.
Sidechain Key	Uses the named host sidechain to control opening.
Sidechain Duck	Uses that key to reduce the main program.
Channel Mode	Choose Stereo or Dual Mono to match the source.

Installation

Quit Logic Pro before installing the signed package. Install the PKG, then reopen Logic so it rescans the current Audio Unit.

Factory Programs

20 programs. Existing program positions are retained wherever this release expands the bank.

#	Program
1	TRANSPARENT PASS [Stereo]
2	VOCAL BREATH GUARD [Stereo]
3	KICK KEY GATE [Stereo]
4	TEHUTI DUCK GUARD [Stereo]
5	KEY + DUCK LOCK [Stereo]
6	DRUM TIGHT GUARD [Stereo]
7	MONO WALL HOLD [Mono]
8	DUAL MONO LOCK [Dual Mono]
9	VOCAL ROOM TAIL [Stereo]
10	VOCAL HARD EDIT [Stereo]
11	RAP PAUSE CLEAN [Stereo]
12	KICK SUB KEY [Stereo]
13	SNARE SHELL TIGHT [Stereo]
14	HAT CHATTER CUT [Stereo]
15	BASS KICK POCKET [Stereo]
16	PAD BREATH KEY [Stereo]
17	MUSIC BUS DUCK [Stereo]
18	FX RETURN SHADOW [Stereo]
19	DUAL MONO PERC LOCK [Dual Mono]
20	DUAL MONO AMBIENCE [Dual Mono]
