TEHUTI

USER MANUAL | VERSION 1.0.1 | 2026-09-01

Purpose

A three-band dynamic EQ field: low, mid, and high ducking move with depth, speed, Flower of Life character, protected gain matching, and channel-mode support.

Fast Start

Start with a source-role program, then use the three reduction meters and history display to set a musical motion. Programs move Low, Mid, High, Depth, Speed, and Flower together while preserving Mix.

Controls

Control	Use
Low / Mid / High Duck	Set movement below 162 Hz, from 162 Hz to 1.62 kHz, and above 1.62 kHz.
Depth / Speed	Set the amount and pace of the three-band contour.
Flower of Life	Adds the optional harmonic field character.
Mix	Preserved on factory recall so you can audition fairly.
Channel Mode	Choose Mono, Stereo, or Dual Mono for the source.

Installation

Quit Logic Pro before installing the signed package. Install the PKG, then reopen Logic so it rescans the current Audio Unit.

Factory Programs

28 programs. Existing program positions are retained wherever this release expands the bank.
